I love it. I really recommend this. This is totally not a glitchy mess.. Intense multiplayer game, if you can get some friends together to play its well worth the price.. Developer says I have no internet. So I shouldn't be able to give any review at all, but I somehow can.

Still could not play this game up to this day because of "connection to master server lost".

Edit: The non-steam version (from their website) works without issues.

Edit 2.0: Because of their customer support I can not recommend this game/company at all. Wish I could refund.. I finished this game in 2 sittings because it was torture the first time around.

My mistake was to play it on Expert which meant (almost) pixel-hunting for interactive objects.

If it wasn't for the map and the hint system, it'd have been a nightmare. Pity that on a few occasions, the map doesn't tell you what's next.

This game also falls victim to not knowing what to do next, checking the map and finding a HO scene.

Also, the ending was creepy and disappointing.. Great, and fun little game.

Nice comedic moments.

Good story.

Good Historic References.

And best of all, "Sit On The Furrher's Lap".

10/10. I really like the concept but i wish the online community was there but apart from that the game can be long winded but if you like skill games then you would like this also you can learn about how a port functions as well as the importance of each part of teh port

---

It's a math puzzle game with blind guessing, horrible music and a story that doesn't fit or make sense.. Looked like it would be a fun game. It is very tedious. You have to select the correct combination of traps and place in the right position and direction. It takes a lot of trial and error to get it right. I played several levels trying to find where it starts getting fun... never got there.. Where you lose base on skill and not someone spinboting. This game is amazing for the price! Great bullet hell and even 1 hour is worth the price!

. Hotline Miami: The FPS. Too bad it plays like absolute \u2665\u2665\u2665\u2665ing

\u2665\u2665\u2665\u2665\u2665\u2665\u2665.. THE GAME IS PURPLE ALL THE TIME PLS FIX THIS PLS!
